

Background changer update?

Posted by Ron Gerritsen - 30 May 2013 20:30

Hello,

I bought Webcam Morpher, but i am not at all satisfied with its quality.

Everyone can tell right away that it's fake. Especially the poor quality of the background changer is a real giveaway, something that did not become clear in the demo.

Is there any chance it will improve soon?

Otherwise: Is there a possibility for a refund?

Thank you very much in advance

Hi Ron,

Did you try BGChanger's settings?
