Can not open any file -Video and Audio Codec issue

Posted by Gil - 19 Dec 2011 23:11

Hi

just downloaded the software.

I can not open any file (tried MPEG, MP3, WAVE). I get error message

saying "Video and Audio codec are not found. The necessary codecs are to be dounloaded. The information on codecs may be found in 'Property Dialog' - Followed by additional error message " The systme can not find the file specified"

Well, I have the Audio and Video codecs

Please help

- Try to remove all the codecs packs installed in your Windows.

- After that download latest K-Lite codecs pack fileforum.betanews.com/detail/KLite-Code...ck-Full/1094057842/3 and install it

==========
