

Synchronize tab greyed-out?...

Posted by Phil - 12 Feb 2012 17:07

Hello,

I like your kakaroke maker thanks! But I can't synchronize text and audio since both possibilities (Sync and Continue sync) are greyed-out under the Synchronize menu tab?... (The set/silence/back and finish buttons remain greyed-out too)

I am using Vista, a picture, a short wma audio file, and a text file as per the tutorial, nothing particular really, can you please advise?

Many thanks in advance!

PS: Just one more thing pls, AV Vid's shortcut asks me to enter the activation code (again) when I open it but as an administrator, do you have any idea why?

Hello,

i have the same effect!

My System Win7 X64, a mp3 file and a text file.

someone has an idea for this problem?

cu nanoc

Hi,

Synchronization can perform only when you hit the Play button after finishing adding both music and lyrics to the project.
