

The lyrics always show as subtitles (on 2 lines)

Posted by Jim - 09 Mar 2012 04:33

Hi!

I don't understand how the lyrics work..... Whatever the way I rearrange the words on my .txt file, they always end up showing on 2 horizontal lines when played in preview mode and on the AVI export, just like movies subtitles...

I just want to see a single word (or phrase) pop up and disappear again when synchronized to the sound. Am I doing something wrong?

Many thanks for your answer,

Regards,

=====

Hi Jim,

Thanks for your feedback. We hope to fix this limitation in the very next version of AV Video karaoke Maker.
