

Female to male voice suggestions VCSD

Posted by That Chick - 26 Jan 2012 06:47

Hey I'm having problems getting a naturally sounding male voice. I'm 25 year old female and probably sound 13 girly voice lol. I want a realistic sexy/hot male voice. Only one I can seem to get is a soft male voice. Any suggestions on what I should set my settings to? Would very well appreciate it. Attached is my real voice. Maybe that could help on the recommendations. I used to have the Reg Voice changer software but just recently got DIAMOND thinking it would make a difference, but so far not seeing much difference. Like I said any suggestions on how to turn my voice into a sexy/hot realistic sounding male would be appreciated.

Hi,

Regarding your problem, we see that your voice is too young in comparison with your age. To turn it into a sexy sounding male voice, we recommend that you should decrease both Pitch and Timbre parameter of your voice by moving the cursor on the Pitch - Timbre graph towards the bottom left corner (we found Pitch ~80%; Timbre ~80% is work). For better result, choose Nickvoices menu >> For Female Input Voice and then try to adjust the cursor based on available nickvoices.

Best regards.
