Hello, further info on your system would be appreciated:

1. YM version currently installed
2. What type of PC Desktop or laptop.
3. Operating System, Version, Patch level (e.g. Windows, XP, Service Pack 1 or 2, etc)
4. Type of Internet connection and speed (e.g. dial-up or broadband, 768 down/128 up, etc)
5. Firewalls in use? If so, which?
6. Type of headset in use?

In the mean time, you can try this tip: support.audio4fun.com/index.php?option=c...orials&Itemid=10
