

Crashes when i start game

Posted by moop - 13 Aug 2011 14:53

When i start game with voice changer open, the voice changer crashes then when i open voice changer from in game, game crashes and voice changer stops working???

Please help

hi moop,

Could you tell me:

- what 's kind of game you use with Voice changer software?
- what 's kind of Operating system you use? Windows XP, Vista, or windows 7?
- And build number of Voice changer software?

Tks 🍌

Hello,

i have tested it a bit and i have a similar problem.

Just that for me, only the games are crashing.

It seems only Source Games are not working like Left 4 Dead, Left 4 Dead 2 and Portal 2.

I use Windows 7 64bit and Version of VCS is 7.0.43.

It crashes even when Morphing is disabled or i use Hook or VAD Mode.

hello again.

I found a workaround for my problem.

I just need to run the VcsCore.exe as another User.

I do it with pressing and holding the Shift-Key and pressing the right mouse button on the icon. Then i select the Option "Run as different user" and use another account. (my has admin rights. But maybe it will work with non-admin users too).

Not sure if there is any recognition in that games so they crash on start and this way the games don't see the application or if it is any problem with my PC.

Maybe that can help others.
