

Registering

Posted by Daniel Tom Jr - 20 Aug 2011 12:03

Can;t get registered...entered the BqKjhc9E2z68bF8 and it does not recognize me to register and use product.

I also can't get the Registration to occur. The Tutorial says to cut & paste the info. When I do that, it still will not work.

On start, I see a popup window VCS Update Manager "Your license is invalid. Please register your license key to continue using", no other options are available. I have tried everything I can think of. The "Tutorial" is no help. There is no way to "register your license key", that phrase makes no sense.
