

## Can't hear my changed voice at all in Windows 7

Posted by Joyce Rajkowski - 07 Sep 2011 20:04

---

I purchased and installed VCS Diamond 7 on my Windows 7 laptop. Am using headphones with mic attached. The Avnex driver is installed, but with Windows 7 can't seem to figure out how to get the voice. Am trying to use Nickvoice and still only hear my own voice - I need help. Anyone out there install this software on Windows 7 - the sound panel is very confusing.

hi, Joyce Rajkowski.

Try again exactly as instructed in the tutorial below in Win 7: [support.audio4fun.com/tutorials/av-voice...in-windows-7-64-bits](http://support.audio4fun.com/tutorials/av-voice...in-windows-7-64-bits)
