

## Parody Voices

I'd like to hear some parody samples. I.E., someone changing their voice to sound like Clint Eastwood, etc. A before and after.

Why do I not see that from the mfg? I understand the demo version won't do this. I'm not going to waste \$100.00 and find it doesn't work well.

Hi,

"Why do I not see that from the mfg?" => what is it? Can you tell me more information?
