

Parody Voice Packs - solved

Posted by Red1384 - 23 Sep 2011 20:18

For those wondering why they won't work, here's the reason.

Opening up the xml file in the C:\Users\UserName\AppData\Local\Avnexus\VC\7Parody directory, the files referenced are missing and the path is invalid.

Take for example the season one pack. The missing files & invalid paths are:

D:\work\20070607\WAV_Files\Kelly_Clarkson.wav

D:\work\20070607\WAV_Files\Justin_Guarini.wav

I have searched my hard drive for the wave files just in case they installed somewhere else, but the files are missing completely. I'd appreciate it if you would fix this problem. Thanks.

The path for parody is not problem. The path is valid.

You can setting for parody voice follow tutorial below:

support.audio4fun.com/discussion-forums/...s-voices-to-work#222
