

Av VoizGame Crashes

Posted by avsp48163 - 17 Nov 2010 00:34

Hi, I have a question as to why AV Voizgame causes Skype to crash on one of my computers. I bought 2 separate licenses to use the program on 2 different computers. Av VoizGame works perfectly fine with Skype and Ventrilo on my laptop but causes my desktop to crash after a couple minutes on skype. Please help!!!

Thanks.

In this case, plz feel free to contact the support for a free license of VCS 7.0 for a better performance and compatibility.
