

VCS Diamond 6.0 compatible with ventrilo?

Posted by Nightsky12 - 07 Jan 2012 10:26

I use W7 64-bit but i cannot get my older version to work with ventrilo. There is no "VAD" option in the preferences. Is this even possible with 6.0?

Hello,

Please update new version. You click [here](#) to open the Voice Changer Software FAQ page. Select question: "Where to find latest version of your purchase product for updating?"
