

## Voice changer 7.0

Posted by Nicholas Hesson - 15 Jan 2012 03:45

---

Following this tutorial I have run into a major problem.

[support.audio4fun.com/tutorials/av-voice...ur-voice-on-ventrilo](http://support.audio4fun.com/tutorials/av-voice...ur-voice-on-ventrilo)

On step three when told to click on Setup button to open Setup windows and go to Voice tab >> In Input device: Microphone (Avnex Virtual Audio Device)I find that their is no microphone avnex virtual audio device selectable. I've researched and cant find a solution wondering if someone can help.

Regarding your problem, please make sure that you've already installed the AV Virtual Audio Driver. For more infomation, visit:

[Install the Virtual Audio Driver of Voice Changer Software \(from version 7.0 and above\)](#)

Or you can contact us at

This e-mail address is being protected from spambots. You need JavaScript enabled to view it

for further support.
