---

Hello I'm wanting to try and trick a friend by having a Asian female voice and I was curious as to hows the best way to go about it? Messed around with it and not too much luck.

Hi stobe,

In this case, identifying a voice as &quot;Asian female voice&quot; is so vague. You know that some Asian girls have high-pitched voice while others have soft and deep ones. Could you please specify the voice you try to imitate?

Hi Stobe,

We recommend to try as following tutorial:

[support.audio4fun.com/tutorials/av-voice...tate-a-friends-voice](http://support.audio4fun.com/tutorials/av-voice...tate-a-friends-voice)

Looking forward to your feedback

Do you have a recording of the voice sample?

We will try it for you.
