

## To loud on Ventrilo.

Posted by Nathan Fryer - 13 Mar 2012 14:43

---

When I use AV VCS with ventrilo others say I'm extremely loud but when I turn it off they say the volume is fine. How can I fix this please?

Hi Nathan,

Please help us clarify your problem with the following info:

1. What type of PC Desktop or laptop.
  2. Operating System, Version, Patch level (e.g. Windows, XP, Service Pack 1 or 2, etc)
  3. CPU Type and Speed
  4. Amount of Memory.
  5. Firewalls & anti-virus program in use? If so, which?
  6. Type of headset in use?
