

CANNOT GET AV VCS DRIVER TO INSTAL

Posted by dave ellis - 23 Jun 2012 04:20

I cannot get the AV VCS driver to install. I've gone through the instructions several times and I'm getting nowhere.

After looking over the system devices, the AVNEX VIRTUAL AUDIO DEVICE status box has the following statement:

"Windows cannot verify the digital signature for the drivers required for this device. A recent hardware or software change might have installed a file that is signed incorrectly or damaged, or that might be malicious software from an unknown source. (Code 52)"

This may be the problem, but not sure how to fix it.

Hi Dave,

We suggest that you could try as the following link to fix the problem:

technet.microsoft.com/en-us/library/ff710454 (WS.10).aspx
