

parody not adding files? it's wav

Posted by hello - 26 Jun 2012 02:10

I am trying to make the parody work on my computer, but I can't use certain files for some reason, they are wav, and then I tried making them 0.5-8 seconds, still didn't work? The only one that has worked so far is recording my own voice in the program?

Hi,

Please try to convert your files into smaller bit rate to fix the problem. (325kbps is recommended)

Otherwise, you're welcome to send us the files then we could try to deal with them.

Also, if you're interested, there are various choices for parody voice at our Add-on Store (support.audio4fun.com/index.php?option=c...ew=category&id=7). The packages are all under .exe format.
