

free trial does nothing?

Posted by theJ - 26 Sep 2012 02:55

Hello, I was hoping to try this out so I downloaded the trial version... and it doesn't even hear my voice. Why would I buy the full version if I don't even know if it's going to work? When I use record, the recording is completely silent. and yes, I installed the driver.

Hi J,

We have not heard something like this ever happened to our Trial users before. So in this case, it would be appreciated if you could clarify with further details:

- Which type is your PC? Desktop or Laptop? OS?
- Which type of your headset?
- What do you use VCS for? Use the application alone or with any other program?
- Did you try any settings with VCS?
- Did you make any change with PC's Audio & Sound settings?
- Beside the AV Voice Changer Software, did you try installing another voice changing application?

- Is there any antivirus program in use? If so, which?

You can also refer to our suggested resolutions: support.audio4fun.com/faqs/av-voice-chan...ho-when-running-vcsd

The trial does work for me, but all the features are disabled. What is the point of a trial if you can't try anything? The only thing that I know works is a deep devil-like voice.

We are so sorry for the inconvenience and kindly ask for your understanding on limitation of trial version.

In this case, we'd suggest you to purchase the full version of VCS for a fully-functional test. And if the program does not suit your need well, we will process a full refund to your order so that you can get your money back.

I have downloaded Trial Version of Voice changer.

I have some voices (wav) to test. Female Voice. How to see that your software is right for me?
