

cobected on mumble and peaple do not hear me

Posted by vincent david - 08 Oct 2012 18:59

hello,

I am connected to mumble but no one hear me, i can hear other people.

I changed the microphone to the avnex one

Is there something else to do ?

Regards

V

Hi Vicent,

Please help us clarify the following details so that we could take a better look on your problem:

- Which type is your PC? Desktop or Laptop? OS?
 - Which type of your headset?
 - Did you try any settings with VCS?
 - Did you make any change with PC's Audio & Sound settings?
 - Beside the AV Voice Changer Software, did you try installing another voice changing application?
