

## Lots of static

Posted by coldbreeze16 - 09 Dec 2012 17:52

---

Whenever I try doing a prank call via AV VCS the other person hears a lot of static and echo besides the morphed voice. I tried changing the mic but to no avail, trying Morph VOX, it worked. But I'd prefer using AV VCS as it has more control.

Hi coldbreeze16,

Regarding your problem with static, could you please help us clarify the following information:

- 1- Which type is your PC? Desktop or Laptop? OS?
- 2- Which type of your headset?
- 3- What do you use VCS for? Use the application alone or with any other program?
- 4- Did you try any settings with VCS?
- 5- Did you make any change with PC's Audio & Sound settings?
- 6- Beside the AV Voice Changer Software, did you try installing another voice changing application?
- 7- Is there any antivirus program in use? If so, which?
