

Steam incapability?

Posted by Lionssss - 16 Dec 2012 22:20

So I downloaded the Av Voice Changer expecting to troll people on Garry's mod and Counter-Strike until I join a game and it crashes. I changed the mic settings successfully and it works on the actual microphone test where your able to change which mic you'll be able to use. This is a real bummer because now I am not incapable of using Av Voice Changer in game via steam. If anyone can help me possibly provide a quick fix it'll be much appreciated.
