

No Morphing Effect At All...Help!

Posted by stephen blevins - 07 Jan 2013 02:49

I can hear myself talking though my headphones, and i managed to get rid of the feedback echo. I turn Duplex on, and turn the Morpher on, but no matter what I do, my voice doesn't change. I've had this software for months and haven't been able to use it at all.

I want to use the nickvoices, but there again, i hear no change. Doesn't Voice Changer Gold come with nickvoices installed already? Or do i have to download them separately and install them?

Please help me, I'd like to use this product!

Thank you.

Hi Stephen,

Did you try any settings with VCSG as well as PC's sound?

You can refer to this article for how to avoid echo: support.audio4fun.com/tutorials/general/...ho-when-running-vcsd

Download Help file [here](#) for detailed instruction on how to start with VCSG
