

Avnex Virtual Audio Device not working

Posted by Robert Mercer - 08 Feb 2013 12:00

Okay so I tried everything, I installed it multiple times, I even went into properties and installed as an admin, Nothing works, the device still doesn't work. please help!

Dear Robert Mercer,

Please find our response for your problems below:

- Reinstall the virtual audio driver to fix the crashing problem:

Manually install AV Virtual Audio Device: Right-click on a VCSD 7.0

shortcut » Choose *Properties* » In *Shortcut* tab, select *Open File

Location* » Choose *Driver* folder » Right-click on * _inst64.exe *» *Run as Administrator* >> Wait till the MSDOS window automatically close. Then your installation is finished, VCSD 7.0 is ready for use.

- The below tutorial is also recommended for doing the job:

support.audio4fun.com/av-voice-changer-s...version-70-and-above

Thanks again for your interest in our products.
