

## AV VCS Diamond parody mixer crashes upon selecting.

Posted by Steven Hall - 04 Mar 2013 22:27

---

Hi,

I just recently got the AV VSC Diamond 7.0 software. It opens fine and microphone works and all but when I try the parody mixer, a windows error box opens and states. "VCS Dispatcher has stopped working, closing the program" Cant see what's wrong, I have 8gb ram, windows 8, AMD FX Quad Core and the headset I'm using is Triton which can used be for pc,ps3 and xbox.

Please help. 😊

Hi Steven,

Please check your Inbox for our detailed email regarding the problem.

Thanks.

Hi, thanks for the advice but it doesn't work. Fresh reinstall did not clear up the problem unfortunately. I stated my pc specs except for my headset which is a Madcats Triton AX 180. Hope this helps.

I have just installed this and have exactly the same issue.

Windows 8, Nvidia GTX650TiBoost, 8Gb, SSD, Asus-realtek board.

Hi Dominic,

Did you try a clean uninstall?
