

Invalid license after pc upgrade to win 8

Posted by Alfred Canlas - 07 Mar 2013 08:37

PC upgraded to win 8. After reinstalling the program, registration says invalid license key. Emailed tech support and said license was reset and try again. The 3 information to be copied and pasted are still the same. License key still invalid. Pls. resolve.

Hi Alfred,

Please help us to find out the Protection Number of your current PC:

1. Download the "vcs_protection_number.exe" file from www.audio4fun.com/download/vcs_protection_number.exe and open it to find the correct Protection Number of your computer.

2. Copy exactly and send us your number

Thanks.
