

Ventrilo not recognizing Microphone (Avnex Virtual

Posted by avsp54010 - 16 May 2011 08:34

My system is Windows 7 - 64 bit. I have made a voice and want to use it on ventrilo. I followed the tutorial but when i go to change input device, Microphone (Avnex Virtual Audio Device) is not listed as an option, I just spent money on voice changer for this specific reason so I am bummed out what do i do?

Reinstall VCS again and try again exactly as instructed in the tutorial below: support.audio4fun.com/products/voice-changer-in-windows-7-64-bits
