

voice changer cuts out while using

Posted by Katherine Loveland - 17 Feb 2014 06:00

I use the voice changer software occasionally while gaming. However, it sometimes cuts out unexpectedly, returning me to my original voice. I'm not sure why this should happen and what I can do to prevent it. Suggestions welcome.

Hello,

Regarding your problem, please help us to clarify the following information:

- 1) What type of your PC? Desktop or laptop.
- 2) Operating System, Version, Patch level (e.g. Windows, XP, Service Pack 1 or 2, etc)
- 3) CPU Type and Speed
- 4) Amount of Memory.
- 5) Type of Internet connection and speed (e.g. dial-up or broadband, 768 down/128 up, etc)
- 6) Router in use? If so, which model?
- 7) Firewalls/anti-virus program in use? If so, which?
- 8) Type of headset in use?
- 9) Which game you're playing with VCS?

Thanks in advance for your info.
