

Unable to install virtual audio driver(WDM)

Posted by Manoranjan Sethi - 11 May 2014 12:03

Hi,

I am Unable to install virtual audio driver(WDM).

while installing the virtual audio driver it complains that not able to uninstall avnex virtual audio driver(WDM).

Kindly suggest

what to do?

Kind regards

Mano

Hi Manoranjan,

I just sent our suggested resolution for your problem via Support Ticket. Please check & try it out.

Looking forward to the result.

Hey,

I thought of replying to your message, because I actually have got the problem in the other way around.

I've submitted a ticket, but apparently..I'm not getting a response.

So I'll post here, what I said in the ticket:

"Hi,

I've got this product since 2014, and I've loved it every single time I use it.

Anyway. It has stopped working as it should. If I look in Device Manager, than look at the properties, it gives me the following remark "Windows cannot verify the digital signature for the drivers required for this device. A recent hardware or software change might have installed a file that is signed incorrectly or damaged, or that might be malicious software from an unknown source. (Code 52)".

I've uninstalled and reinstalled it multiple times too, that didn't work.

I know I can suppress certain things in Windows, but I don't like to do that. I want the program to work as it used to work without me having to change the skeleton of my Windows-body.

Is there a way to fix it? If so, how do I fix it without having to alter my registry or going into troubleshooting of windows?

Thank you in advance for your time.

I hope to hear from you soon."
