

Sound not working

Posted by Alyssia Park - 21 May 2014 15:29

I have installed the program and installed the audio device, but I hear absolutely no sound coming from the program when I turn up duplex. I try using Skype to test it but I don't hear anything from there either. It doesn't detect my voice at all. I have recently uninstalled AV Voice Changer 7 to install 8, if that helps.
