

Is there a support team?

Posted by Satish Viswanathan - 10 Aug 2014 07:30

#Tried downloading the Nick Voice and Version 8 Diamond says it cannot recognise the .nvc file! so much for the tutorial that asked me to do this!

So, Can you pls help me Support Team? I would like to get a documentation for Version 8 that explains how to convert the Version 7 settings into the 8 Views.

Please help! this is urgent and important!

Hi Satish,

For Version 8.0 manual file, please go to www.audio4fun.com/ug/voice-changer-software-diamond8/

By the way, please make sure that you came to the right place for Diamond 8.0 add-ons:

support.audio4fun.com/index.php?option=c...ew=product&id=10

* If the downloaded nickvoice packs are in EXE format, after being successfully installed, the new voices will be auto added to VCSD8.

** If the downloaded nickvoice packs are in RAR/ZIP format, you need to extract it and manually load to each appropriate module.

The extracted folder may include setting files as below:

NVC File - Nickvoice (Voice Morpher panel)

FMR File - Frequency Morpher (Advance panel)

EQ File - Equalizer (Advance panel)

SNDQ File - Sound Quality (Advance panel)

VEQ File - Voice Equalizer (Advance panel)

...

Please follow this tutorial for detailed instruction on how to load the files into VCSD8: support.audio4fun.com/tutorials/av-voice...-pre-saved-nickvoice

Good luck and have a nice day!
