---

Hello, I have just bought a formal version of your software(Voice Changer 8.0 Diamond), but I don't know how to adjusting the parameters of the software to make my voice sounds more real (male to female), I hope you help me find the most suitable for voice software parameters. There are two audio accessories, my voice, name for "1. Mp3" the voice is the voice of my original without any software processing, name for "2. Mp3" voice is an audio plug-in I use voice effect, while the voice of the effect is very good, but there will be a strong vibrato and electronic sounds. I hope you can use your software to help me transfer to effect such as "2. Mp3". Tks!

Dear Sundy,

Please take a look on this setting.
