

Upgrade to VCSD 8,0

Posted by JJ - 20 Dec 2014 16:58

Upgraded to 8.0 I've had nothing but problems. I either get static loud in my mic or no audio at all. Hasnt worked from day one. I've uninstalled and reinstalled 6-7 times. I dont know if my audio settings are bad or my firewall is affecting it or the new new upgrade is bad. Any help shared would be good.
