

## My Music with Created Voice

Posted by Gerard StCroix - 26 Apr 2012 17:52

---

I have created a voice with your software for a childrens song I wrote with a simple melody.

Now , I have m-audio by AVID. I created my music in it and now want to add my created fun voice to my music. I believed this to be a simple step...But, m-audio by AVID can not Read the file created in audio4fun

Diamond edition? Any Suggestions??

Gerard

Hi Gerard,

Did you try to convert the file into another format?

Since you started your topic in Music Morpher category, we don't know if you have tried with Converter task of Music Morpher yet. We thought this will work the problem out.
